1.EXECUTIVE SUMMARY

1.1 BUSINESS DESCRIPTION

- We empower Mauritians to satisfy their tastes and enjoy their food by reproducing popular local and international dishes which require less oil, salt and unhealthy fats, all while being nutritional and healthy.

1.2 TARGET AUDIENCE

- Our restaurant is for the general Mauritian population, especially those who are willing to adopt a new and healthier lifestyle. We have been exposed to the harsh reality that a significant percentage of our citizens suffers from self-inflicted diseases such as obesity, diabetes and hypertension.

1.3 KEYS TO SUCCESS

- The restaurant will market itself through its prime location, local pamphlet distribution, and strong social media presence. Paid ads and a website will promote offers and online orders, while customers will be encouraged to share reviews and feedback online.
- Expanding our business throughout the island at a later stage and providing delivery services as well will enable us to grow our clientele and income.
- We ultimately aim to gain international recognition and achieve a 3-star rating to build a strong brand reputation and hence more customers.

1.4 OUR SUCCESS

- Our business will not suffer from loss. We will have enough money to pay our staffs and ourselves (the 6 co-founders) will earn a reasonable monthly income. Moreover, the business will have enough cash at hand at the end of the year.

2. BUSINESS DESCRIPTION

2.1 OVERVIEW:

At Fusion Resto, we believe that healthy food can be delicious too. The famous Roman poet Virgil rightly said: “The greatest wealth is health”. This means, our customers’ health is our priority. Therefore, our team will focus on providing a myriad of healthy and delicious dishes to our customers with a fine dining experience. This will enable us to achieve our main goals: helping our customers in their health and fitness journey.

Opening Hours

Days	Morning	Evening
Monday → Friday	11 00 am - 03 00 pm	06 30 pm - 11 00 pm
Weekends & Public holidays	10 30 am - 02 30 pm	06 30 pm - 01 00 am

2.2 COMPANY LOCATION

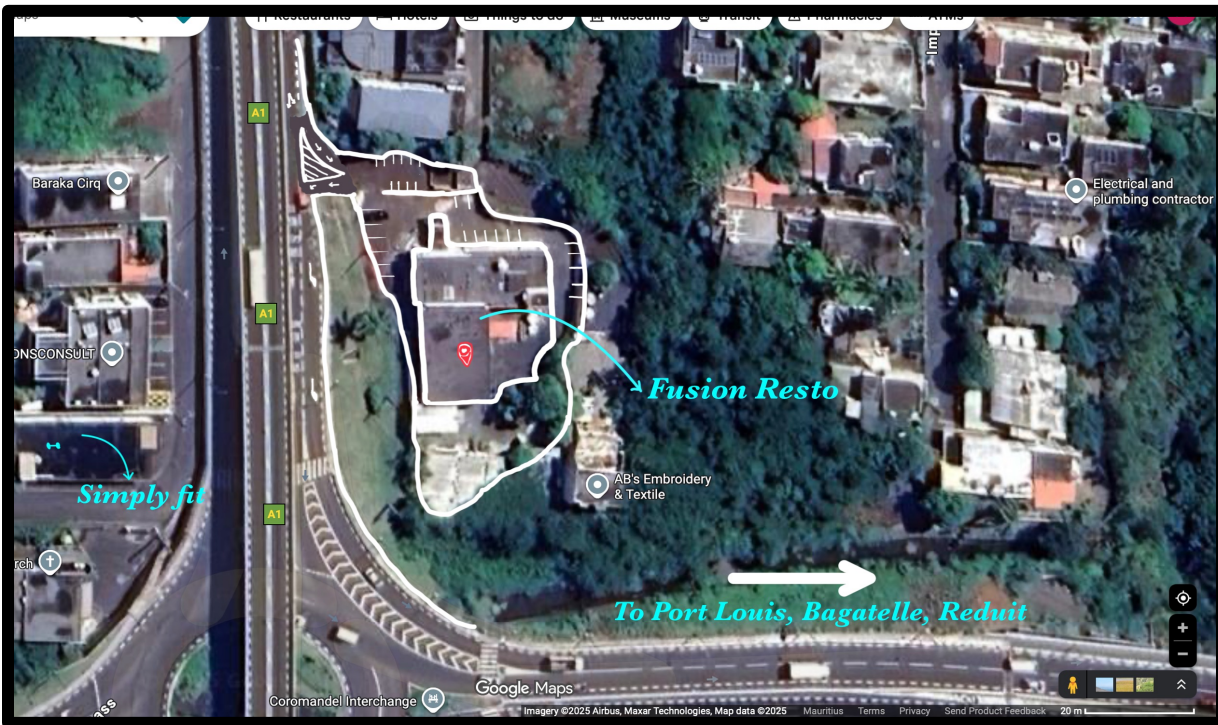

The company is strategically positioned on the main A1 Road and next to the SAJ bridge linking A1 to the M1 motorway. This means that people going to Rose Hill, Port Louis, Bagatelle, Reduit and amongst other places will pass by our restaurant. Also located opposite it, is the Simply Fit gym. People going there are already health conscious and highly likely going to be our clientele. It is also just a few metres from highly visited supermarkets namely: Winner’s Coromandel and Intermart Beau Bassin. The restaurant will also have high visibility from people coming from the West part of the island such as Flic-en-Flac taking the A1- M1 interchange.

Important note: The building (labelled Fusion Resto) shown in the Map 2 is the property of Ayush — one of the Fusion Resto’s stakeholders. Hence, we shall establish our restaurant there.

MAP 1

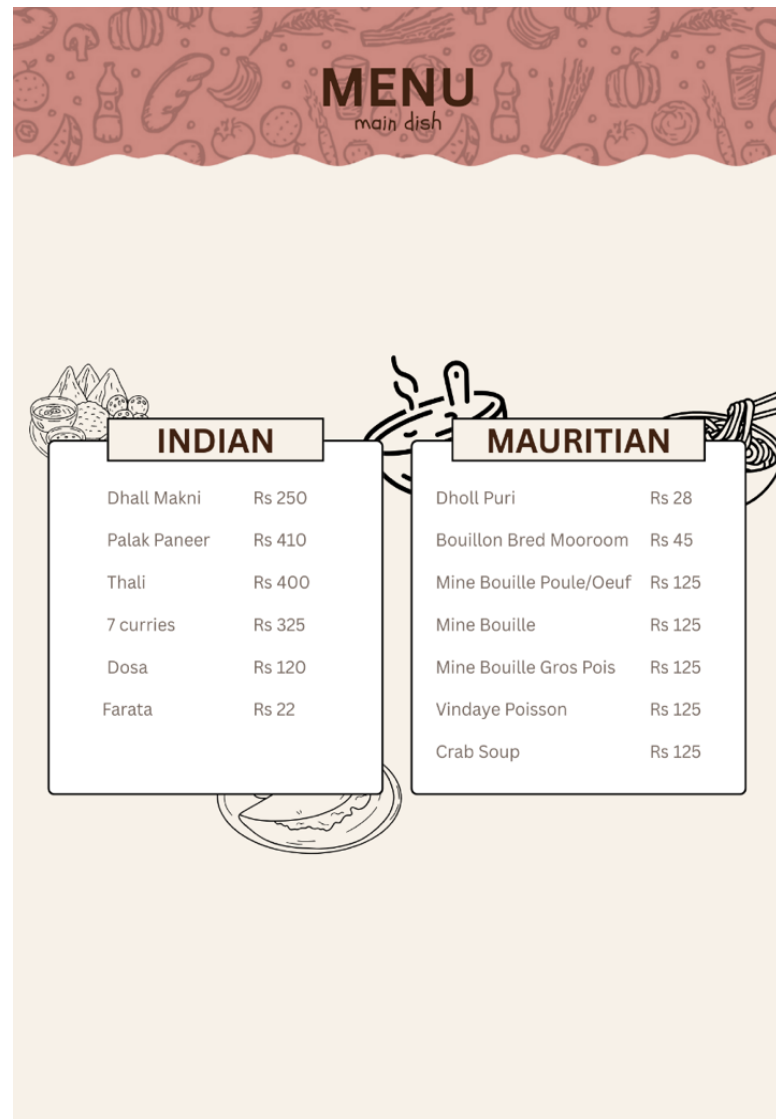

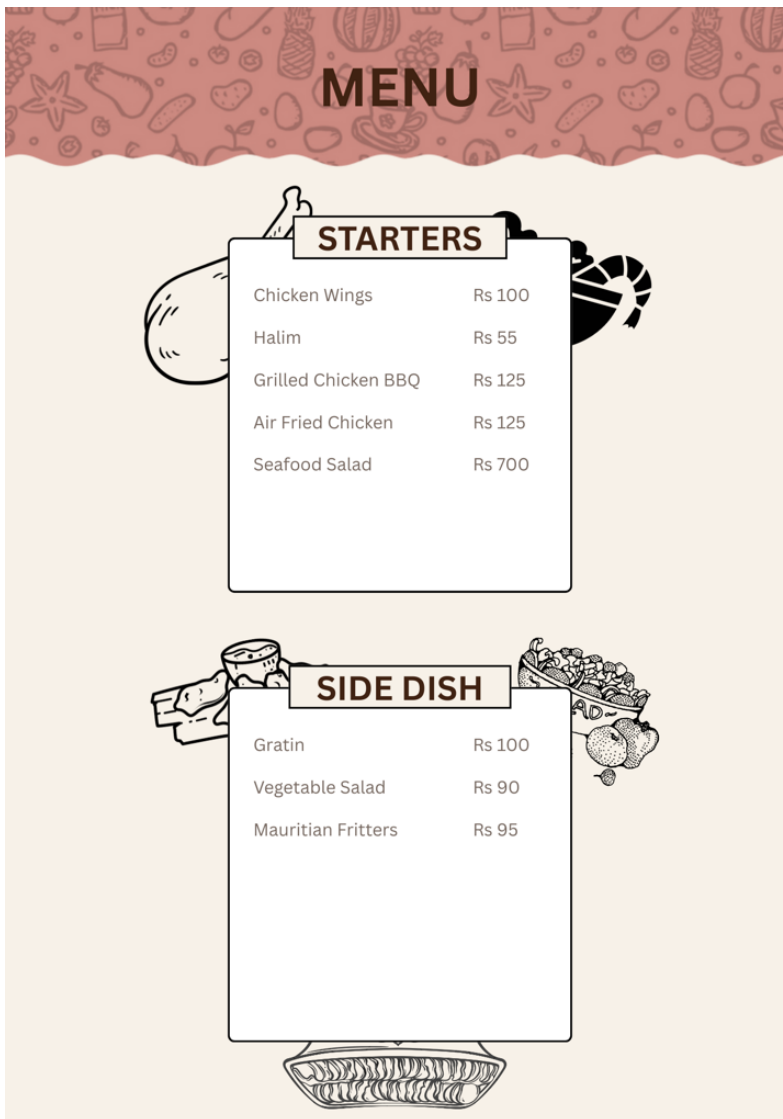

MAP 2

2.3 WHAT ARE WE OFFERING?

We offer a mix of product and service. We are a healthy restaurant offering sufficient parking space, free delivery to nearby localities, online ordering of food and dine-in option. We also have entertainments such as live Sega show and live music play. We offer special reservations for birthday parties, receptions and reserved tables for family dinners.

2.4 WHY DOES IT MATTER IN THE MAURITIAN CONTEXT?

- A 2022 survey by Ministry of Health and Wellness found that **72%** of the Mauritian population was overweight/obese. The dietary factors of the obesity included unhealthy food choices. These include high consumption of soft drinks, fast foods and processed foods.
- On the other side, there is low fruit and vegetable intake daily, and unaffordable healthy diet. Around **20%** of the population have diabetes. Another survey conducted in that same year, found that **27.2%** of the surveyed population were diagnosed with high blood pressure.
- According to a survey conducted in 2021 by Mauritius NCD, the prevalence of high cholesterol in Mauritius had an overall percentage of **34.8%**.
- Our aim is to combat these problems by providing a healthy food alternative and selling our products at an affordable price.

3. MARKET ANALYSIS

3.1 TARGET AUDIENCE

- Our primary target audience for our restaurant consists of health-conscious Mauritians, particularly vegetarians, vegans and fitness enthusiasts.
- Even though our island attracts countless tourists, our products are mainly designed for the local population rather than our visitors.

We focus mainly on Mauritians because:

- Local customers are more used to our fusion cuisines that combine Indian, Mauritian, and Asian influences.
- Unlike tourists, who are here seasonally, local customers are consistent and provide long-term patronage.
- Our pricing strategy and delivery services cater better to the daily lifestyles and budgets of Mauritians.
- There's a health awareness trend among young adults and working professionals where they adhere to organic food consumption and are fitness enthusiasts.

3.2 4Ps OF MARKETING:

1. Product

- Our restaurant offers a wide range of healthy fusion cuisines which combine diverse dishes ranging from Mauritian, Indian to Chinese, Italian and Arabian cuisines. We prefer organic ingredients, olive oil instead of palm oil, and Himalayan salt to foster health benefits namely reduced BP.
- Our desserts constitute of natural sweeteners such as honey instead of refined sugar, and our usual basmati rice is replaced by brown rice to add for nutritional value.
- Now our unique selling proposition is to be a 'one-stop healthy restaurant' which offers a variety of cuisines all under one roof while focusing on health, freshness, and affordability.

2. Price

- Our pricing strategy is placed upon a value – based approach. Reduced prices are our main concerns to attract students and workers all while maintaining proper food quality.
- We may put forward decoy pricing, whereby a less attractive menu option is offered to make profitable and healthier dishes look more appealing and easier to buy. Customer choices are subtly affected by the former.

3. Place

- The location of the restaurant will be in a high – traffic urban area which is close to universities, has many access points and close to gyms and residential zones.
- We will put forward free delivery schemes to nearby areas. Our extended working hours will be 7.5 hours on weekdays and 8.5 hours on weekends, these ensure that customers need not compromise their schedules or their cravings. From a quick business lunch to a late-night dessert, we are here to prepare your favourite meal.

- Customers can also scan a QR code placed on their tables and outside on the wall of the restaurant or at the cashier to instantly access the digital menu, place orders and make payments online – offering a modern, zero contact and hygienic experience.
- The integration of such a technological advance reduces waiting time and enhances satisfaction.

4. Promotion

- We will promote our business through a multi-channel marketing strategy where we'll focus on:
- Social media marketing, where we'll use different platforms such as Facebook, Instagram, and TikTok to depict our deals and customer experiences.
- Points and discounts for habitual customers and those who bring new guests with them.
- Promotional events such as 'Healthy Meal Week' or 'Vegan Day'.
- Different collaborations such as partnering with local gyms, fitness clubs and influencers to further promote the business.
- We have also been approached by Green Oil – a company that collects used oil from restaurants and hotels and then exports this oil to Spain for converting it into biodiesel. This is a win-win situation for both parties. We would have had to dispose oil after 2-to-3-time usage and then dispose it. Instead of polluting the environment, we will be collecting them in tanks which will be collected by Green Oil. The latter will then export this oil to make biodiesel.

3.3 COMPETITORS

Competitors Analysis

Our main competitors include fast food outlets such as KFC, McDonald's, Gool Square amongst others. Additionally, we also have different restaurants namely Sitar, Pizza Inn, Indra, PureVeg, Domaine Anna, Calif, Happy Rajah, Ocean Basket and hotel restaurants. However, we differ from them in many categories:

- Our restaurant sells organic, fresh and low- fat ingredients food.
- Our prices are value-driven rather than lucrative.
- With low oil usage, using honey instead of sugar and the use of Himalayan salt —health benefits are a great deal.
- Our target market is health-conscious locals including the gym enthusiasts from Simply Fit and students.
- Our service model is more up to date and offers free delivery.
- The restaurant itself is family-friendly with no dedicated smoking area and is alcohol-free.
- We offer diverse cuisines (a one-stop-shop restaurant).
- Our operating hours are extended for flexibility and ease of access.

Operational Advantage

To take full advantage of our operations and cost management:

- We will employ trained Bangladeshi staff to handle kitchen and cleaning duties as they are reputed for their consistency and work ethic.
- Foreign students (Nepalis and Africans) will also be offered part-time evening and weekend roles whereby they can gain working experience while studying.
- So, this maintains our cost efficiency and smoothen our operations all while providing job opportunities.

5. IMPLEMENTATION OF BUSINESS

- During the first phase of the implementation plan, we will be renovating the building by painting it. We will also have to furnish it with table, chairs and kitchen equipment. To create an ambient and comfortable atmosphere, we will be adding a sound system, decorations and air conditioner. As for our delivery service which we are offering — we will be purchasing two new scooters.
- We would also need to have some legal and administrative formalities. These would include the registration of our business with the Registrar of Companies and register with the Mauritius Revenue Authority (MRA) for Income Tax.
- We would also require obtaining specific licenses and permits such as Trade License, Music License from the Mauritius Society of Authors (MASA), Fire Certificate from the Mauritius Fire and Rescue Service and Signboard Permit.
- It will be necessary for us to register with the Mauritius Employees Relief Fund (MERF) and the National Pension Fund (NPF) to abide by employment regulations.
- It is also important for us to register with the Wastewater Management Authority and Municipality of Beau Bassin/ Rose Hill for the proper disposal of sewage and solid wastes.

SWOT ANALYSIS FOR OUR RESTAURANT

Strengths

- **Good Location:** Situated in a high-traffic area (supermarkets).
- **Health-Oriented Concept:** Focus on low-cholesterol and low-sugar meals appeals to health-conscious customers, diabetics, and fitness enthusiasts.
- **Strong Customer Service:** Dynamic, friendly and efficient staff enhance customer satisfaction.
- **Ambiance & Experience:** Attractive interior design, comfortable seating, and good music.
- **Diverse Menu Offering:** Combines popular cuisines (Italian, Chinese, Indian, and Mauritian), attracting a wide customer base with different tastes.
- **Unique Market Position:** Few restaurants in Mauritius combine multi-cuisine and health-focused meals — giving us a **competitive edge**.

- **Quality Food & Unique Menu:** Offers delicious and well-prepared dishes that attract repeat customers.
- **Potential for Repeat Customers:** Healthy food lovers and office workers could make it a regular dining spot.

Weaknesses

- **Limited Awareness:** As a new brand, it may take time to educate customers about the “healthy multi-cuisine” concept.
- **High Operating Costs:** utilities, salaries, and ingredient costs (droughts or flooding) can be high.
- **Lower Margins on Healthy Dishes:** Some low-fat or sugar-free substitutes are more expensive but may not justify higher menu prices initially.
- **Dependence on Key Staff:** Over-reliance on a particular chef or manager.
- **Complex Menu Management:** Offering multiple cuisines requires skilled chefs and precise quality control — risk of inconsistency.
- **Higher Operating Costs:** Healthier ingredients and specialized chefs can increase expenses.
- **Training Requirements:** Staff must be well-trained to understand different cuisines and dietary concerns.

Opportunities

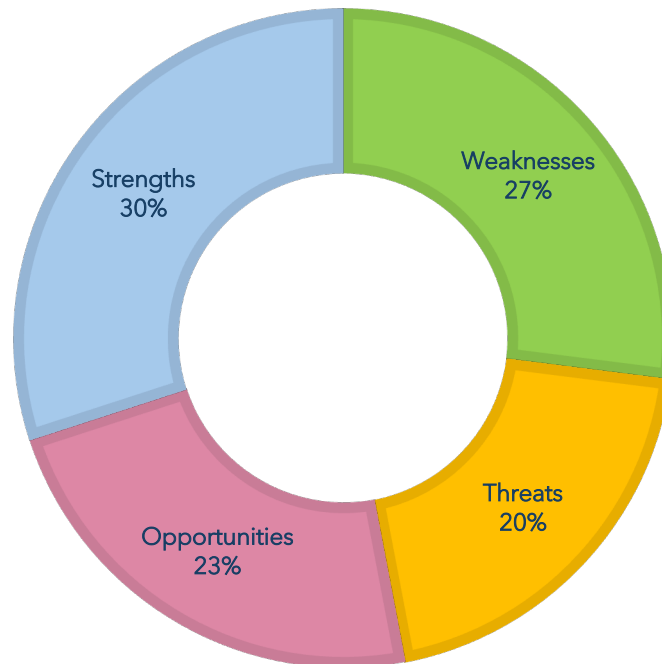

- **Cultural or Health Trends:** Offering vegan, organic, or gluten-free options.
- **Expansion Potential:** If successful, the concept could be franchised across Mauritius or even the region.
- **Growing Health Consciousness:** More Mauritians are paying attention to diet, fitness, and wellness.
- **Expanding to New Locations:** Opening branches or franchising.
- **Partnerships:** Collaborating with hotels or online food bloggers.
- **Online Delivery:** Tie-ups with food delivery apps (Ordermanzer) to reach customers who prefer eating healthy at home.

Threats

- **High Competition:** Many established brand restaurants and fast-food chains in Beau-Bassin, Rose hill, Port Louis, Ebene and Bagatelle. Cheap local eateries may attract customers with lower prices.
- **Changing Consumer Preferences:** Customers shifting towards cheaper options.
- **Supply Chain Disruptions:** Ingredient shortages and price fluctuations, especially for seafood.

- **Changing Diet Trends:** Health trends shift quickly — e.g. keto today, vegan tomorrow.
- **Customer Scepticism:** Some may doubt that “healthy food” can taste good — marketing must counter this.

		Fruits	30 000
		Meat	140 000
		Public health license	1 500

5.2 MARKETING STRATEGY

- Our main marketing strategy is our strategic location itself. Initially, we will also be dropping pamphlets of our restaurant in the letter boxes of nearby residents.
- Then, we will aggressively use social media platforms such as Facebook, Instagram, TikTok, LinkedIn and WhatsApp. This is because most people these days are connected to these social media platforms and have a phone. This is a direct way to build awareness and maintain customer loyalty. We will regularly be posting on these platforms.
- We will also be using paid advertising from Google, Facebook and Instagram ads. Posts of offers on special deals, discounts and new offers. We will also have an online presence through a website that will allow people to check our menu, services, opening hours and order food.
- We will also be promoting our restaurant using our own social media accounts. This would include sharing on our stories/statuses and reposting feeds. We would also encourage clients to share their reviews and feedback with their network of friends, family members and on Google review.

BENEFITS OF SOCIAL MEDIA MARKETING

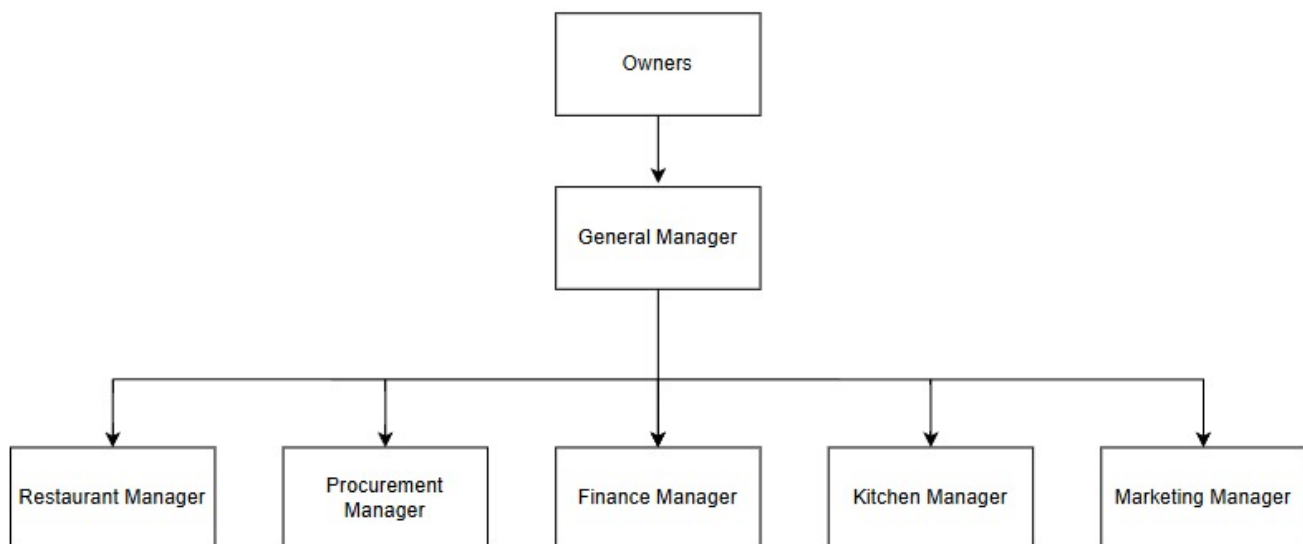

6.MANAGEMENT TEAM

The company consists of six stakeholders who invest equal capital to the business and hence profit is shared equally. The 6 persons work full-time in the business and do not hire workers as the business has just started.

The business is co-founded and equally owned by Jatin, Yash, Seren, Ridwaan, Siddhant & Ayush. We have equally invested Rs 100 000 in the business for setting it up.

6.1 ORGANISATIONAL STRUCTURE

General Manager

Yash, our restaurant general manager, is responsible for overseeing the entire restaurant's operation, from financial performance and daily management to staff leadership and customer satisfaction. His key roles include managing staff through hiring, training, and scheduling; handling daily operations like inventory and quality control; and ensuring profitability through budgeting, marketing, and strategic planning.

Restaurant Manager

Jatin is mainly concerned with the front of house management. He ensures that it runs smoothly and profitably while providing excellent customer service. Jatin key duties include managing reservations, handling the Point of Sale, receiving customers, addressing customer complaints and overseeing waiters. This role requires strong leadership, organisational, and customer service skills, as well as financial and operational expertise.

Procurement Manager

Seren's role as a procurement manager is to oversee the company's purchasing process, ensuring it acquires necessary goods and services at the best value while maintaining quality. This includes developing sourcing strategies, negotiating contracts with suppliers, managing vendor relationships, and overseeing the procurement team to ensure smooth operations and compliance. They are crucial for cost efficiency and supply chain stability.

Finance Manager

Ridwaan: As a finance manager, I am responsible for the organization's financial health, overseeing activities like budget planning, financial reporting, and investment strategies to support executive management. My role involves analysing financial data, managing cash flow, and developing plans to achieve long-term financial goals whilst ensuring legal and regulatory compliance.

Marketing Manager

Siddhant: As the marketing manager, my responsibility is to develop, implement, and oversee marketing strategies. These help to promote our company's products and services, attract new customers and retain existing ones. I also manage campaigns, conduct market research, set budgets, lead a marketing team, and analyse data to make strategic decisions. I often collaborate with other departments to ensure a cohesive and effective approach to increasing brand awareness and profits.

Kitchen Manager

Ayush: My role is to oversee all aspects of a kitchen's daily operations. This includes managing staff, controlling costs, ensuring food safety and maintaining quality standards. I am also proactively hiring and training staff. I manage inventory and ordering of items. I also create schedules, enforce cleanliness and hygiene regulations to ensure a smooth and profitable kitchen.

7. BASIC FINANCIAL PROJECTION

7.1 ESTIMATED FINANCIAL STATEMENTS

For the first year 2025, we will be able to make a profit of Rs 351 409 after deducting all our cost of sales and expenses which included our income and our employees' salary.

INCOME STATEMENT FOR THE YEAR ENDED 2025		
REVENUE		
Mauritian meals		2,000,000
Italian meals		1,750,000
Arabian meals		1,200,000
Chinese meals		1,400,000
Drinks/Desserts		840,000
Total Revenue		7,190,000
Less cost of sales		3,000,000
GROSS PROFIT		4,190,000
Less Expenses		
Stakeholders' salary	2,000,000	
Renovation costs	10,000	
Worker's salary (Cleaner, waiters, Chefs)	1,392,000	
Utilities (electricity, water, gas, WiFi)	160,800	
Delivery expenses (fuel, maintenance)	72,000	
Marketing & advertising	36,000	
Maintenance	36,000	
Miscellaneous	24,000	
Loan interest (8%)	30,657	
Trade license fee	8,000	
Public health license	1,500	
Fire reinspection	996	
Other licenses (business, music, signboard, fire)	4,625	
Total expenses		3,776,578
Profit for the year before tax		413,422
Less tax (15%)		62013.27
PROFIT FOR THE YEAR AFTER TAX DEDUCTION		351,409

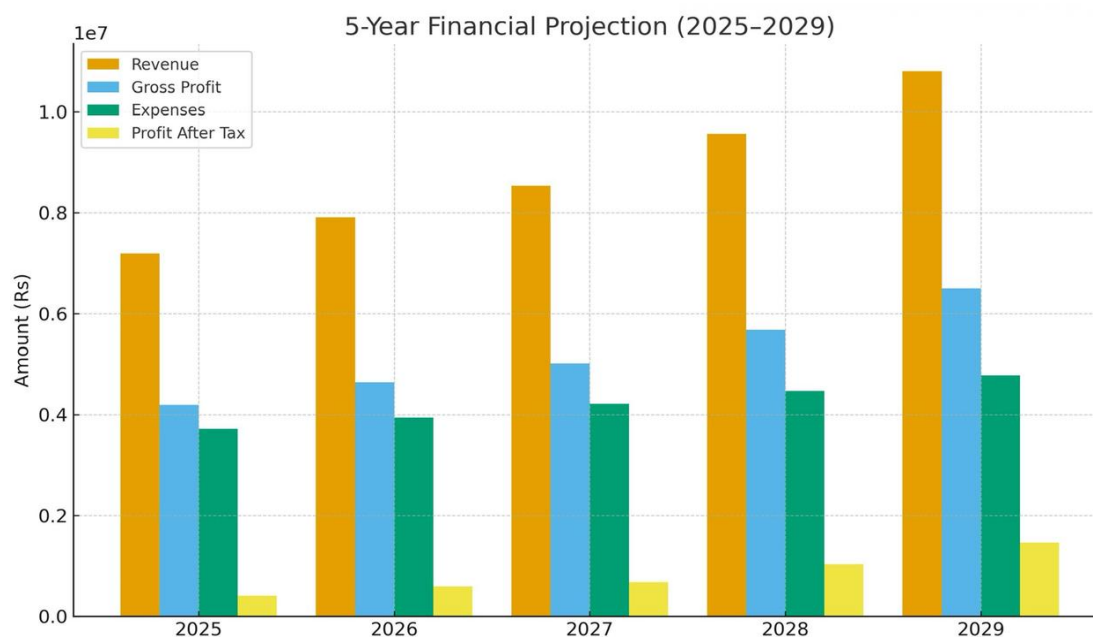

Our total assets and our total equity and liabilities have been tallied at Rs 1 334 624 with a cash at bank of Rs 368 534 and we will be needing a loan of Rs 383 215.

STATEMENT OF FINANCIAL POSITION AS AT 2025			
<u>Non-current assets</u>			
Machinery	100000		100000
Kitchen appliances	417890		417890
Appliances for water system	34450		34450
Tables, Chairs and Sofa	125000		125000
Security system	43750		43750
Entertainment system	125000		125000
Air Conditioning system	120000		120000
Total non-current assets			966090
<u>Current assets</u>			
Cash at bank			368534
TOTAL ASSETS			1334624
<u>Equity and liabilities</u>			
Capital		600000	
Profit for the year		351409	
Total Equity			951409
<u>Non- current liabilities</u>			
loan			383215
TOTAL EQUITY AND LIABILITIES			1334624

7.2 FINANCIAL PROJECTION IN THE FIRST FIVE YEAR

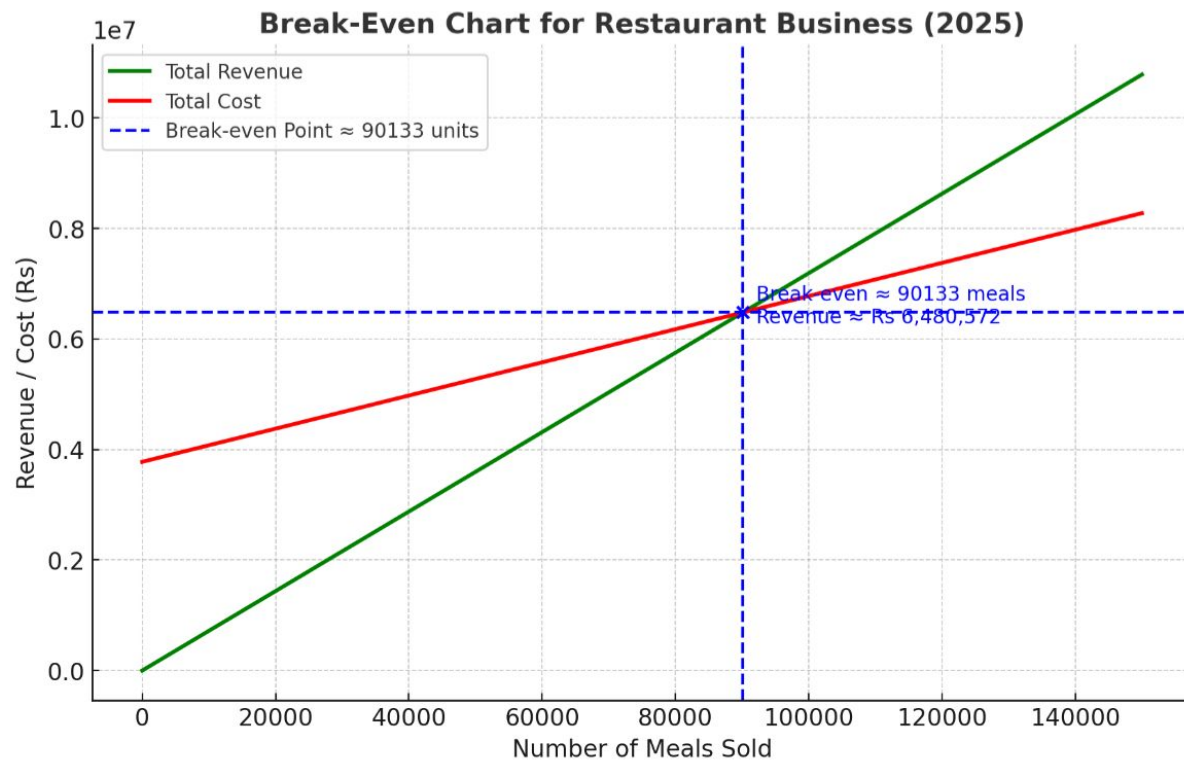

For the year 2026, our revenue will increase by 10%, our cost of sales will increase by 9% and finally our expense growth by 6%. Moving to the following year, our revenue growth will increase by 8%, our cost of sales will increase by 8% and finally our expense growth will increase by 7%. Now, to 2028, our revenue will increase by 12%, our cost of sales will increase by 10% and our expense growth by 6%. For the final year, our revenue will increase by 13%, our cost of sales will increase by 11% and our expense growth by 7%.

Year	Revenue Growth	Cost of Sales Growth	Expense Growth
2025	Base Year	Base Year	Base Year
2026	+10%	+9%	+6%
2027	+8%	+8%	+7%
2028	+12%	+10%	+6%
2029	+13%	+11%	+7%

7.2 BREAK-EVEN POINT

We have estimated that after around 11 months our business will break even.

ABOUT ME

I am a young dynamic individual who was first introduced to the world of IT and management during university. I have chosen management as my career path since I enjoy socialising and discovering new people. I like to be the one tasked to lead challenging endeavours and know how to delegate responsibilities.

SUMMARY

A student who just completed his studies at the University of Mauritius looking for an opportunity to head into the working field. Possesses efficient maths skills, can speak both English and French fluently and has a good grasp of the technological world.

EXPERIENCE

Dec 2022 — Jul 2024

Procurement Manager

La Pirogue

Set in motion the development of a sourcing strategy for a healthy restaurant by identifying and evaluating potential suppliers for local, organic, and specialty ingredients. Led the negotiation of favorable terms with key suppliers for fresh produce, proteins, and dry goods, which brought about a 10% reduction in initial ingredient costs against standard market rates. Detailing cost-saving strategies and risk mitigation plans to ensure financial and operational viability. I authored the procurement and supply chain section of the business. Purchase activities were well aligned with the organisation's financial projections and launch roadmap.
